Aditya College of Engineering, Surampalem. CGPA: 6.79

PROJECT EXPERIENCE

• Face Recognition Photo Organiser

This is the project where we get the images segregated or separated using the face recognition. Simply we can say that if the image contains the face of person A then the image will go into the folder of the person A. Like this every face will have separate folder. This project is implemented by using the Aws tools like S3, Aws Recognition; Python for backend; Html, CSS and JavaScript for frontend.
